Think Texture. Think Granosite.
Granosite texture coating systems can be applied onto the following substrates*:

- Brickwork / Blockwork
- Concrete – Insitu
- Concrete - Pre-cast / Tilt-up
- Cement Render
- Masonry
- Fibre cement
- Compressed Fibre Cement (CFC)
- AAC (Autoclaved Aerated Concrete)
- Expanded Polystyrene (EPS) Building Systems
- Extruded XPS
- Repaint Projects
- Previously painted surface (oil / solvent borne)
- Previously painted surface (latex / water based)
- Changing existing texture
- Rejuvenate existing textures

*Always refer to technical data sheets and system specification sheets for appropriate preparation and application information

### Surface Preparation

The most important part of the whole job

“The performance of a coating system is directly related to the degree of surface preparation, application methods and environment.”

- Surface preparation is designed to make good surface defects such as concrete spalling, cracks, delamination, pitting and efflorescence – not design faults
- The level of surface preparation required to mask surface defects is dependant upon the system chosen
- Always refer to technical data sheets and system specification sheets for appropriate preparation and application information

### Surface Preparation Products

<table>
<thead>
<tr>
<th>GranoBond</th>
<th>Pure acrylic water based admixture for:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- cement mixes</td>
</tr>
<tr>
<td></td>
<td>- concrete</td>
</tr>
<tr>
<td></td>
<td>- hard wall plaster</td>
</tr>
<tr>
<td></td>
<td>Can be used as a seal coat over porous substrates prior to rendering</td>
</tr>
</tbody>
</table>

| Granosite Tilt-Clean | High performance washing agent applied directly to concrete to effectively remove bond breakers, curing compounds and other contaminants, ensuring adhesion of subsequent Granosite system |

### Skimcoats & Fillers

- For filling surface defects
- For achieving a uniform surface finish

<table>
<thead>
<tr>
<th>GranoFlex</th>
<th>High performance acrylic jointing compound specifically designed for application to fibre cement sheeting</th>
</tr>
</thead>
<tbody>
<tr>
<td>GranoPatch Smooth</td>
<td>Smooth patching compound applied by trowel or spackle knife, to repair defects in concrete and most masonry surfaces, For filling defects up to 4mm in one application</td>
</tr>
</tbody>
</table>
Grano Adhesive Mortar Coarse
- High quality polymer modified render which can be applied between 4-5mm in thickness
- Designed for rendering over EPS Polystyrene sheets and blocks, AAC, concrete blocks and bricks

Grano Adhesive Mortar Fine
- High quality polymer modified render which can be applied between 4-5mm in thickness
- Designed for rendering on detail work around windows, openings etc over EPS Polystyrene sheets and blocks, AAC, concrete blocks and bricks

Grano Renovation Render
- High quality polymer modified render which can be applied between 2-4mm in thickness
- Designed for applications over previously painted substrates and XPS Extruded Polystyrene

Grano Traditional Render
- High quality preblended cementation render
- Applied between 5-10mm thickness in one application
- Suitable for use over concrete blocks and bricks

Grano Lite Weight
- High quality lightweight pre blended polymer modified cementation render
- Applied between 8-10mm thickness in one application
- Designed for rendering over fibre cement backing sheet

Grano Sponge Finish 1mm
- High performance pre blended modified cement based texture
- Formulated to produce a sponge or floated finish

Renders – dry mix in bags
- Premixed, rendering and screeding materials specifically designed for thin section rendering
- Designed to specifically work in conjunction with Granosite Plaster Systems, NuTherm, NuRener, NuSolid, NuLite – refer technical manuals or www.wattyl.co.nz
- Premixed to maximise consistency and performance from bag to bag
- Can be over coated after 7 days – refer data sheets.

Primers & Sealers
- Ensure optimum performance of the complete coating system by stabilising irregularities in substrate absorption and mechanical strength
- Dependant on project requirements, there are various types:
  - Water Based
  - Oil Based
  - Tintable

GranoPrime
- Water based acrylic primer sealer. It is applied by brush, roller or airless spray, prior to the application of most Granosite texture finishes
- White appearance

GranoPrime ‘S’
- Solvent based acrylic primer, designed to eliminate uneven substrate absorption on dense or difficult substrates ensuring optimum adhesion
- Designed for: Precast and tilt-up concrete
  - Glass reinforced concrete (GRC)
- Milky appearance when wet, dries to a milky appearance
### Roll On Texture Systems

- A convenient means to decorate with textured finishes
- Can assist with hiding minor irregularities
- Moderate skill levels required
- Available in fine to coarse finishes

#### GranoSahara*
GranoSahara is an extremely versatile, subtle texture coating designed to for simulating a profile sandy finish. Can be applied by nap roller and black texture roller. GranoSahara can be left matt; (ie. not top coated) or top coated for enhanced durability, depending on specification.

#### GranoRoll-on Coarse*
GranoRoll-on Coarse is an acrylic, high performance coating applied by coarse texture roller to achieve a coarse profiled texture. Top coated with GranolImpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

#### GranoRoll-on Medium*
GranoRoll-on Medium is an acrylic, high performance coating applied by black texture roller to achieve a medium profiled texture. Top coated with GranolImpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

#### GranoPearl Roll-on*
GranoPearl is a high-build, texture coating system, rolled on to give a bold texture or then hand worked to give a gentler, flattened finish. Top coated with GranolImpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

#### GranoRoll-on Smooth*
GranoRoll-on Smooth is an acrylic, high performance coating applied by black texture roller to achieve a low to medium profiled texture. Top coated with GranolImpact, Granoshield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

#### GranoRoll-on Coarse*
GranoRoll-on Coarse is an acrylic, high performance coating applied by coarse texture roller to achieve a coarse profiled texture. Top coated with GranolImpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

#### GranoSoffit*
GranoSoffit is specialist soffit designed specifically for fast finishing of soffits and off-form concrete ceilings. GranoSoffit offers very low roller spatter and achieves a high opacity matt finish. Application is typically in one coat over GranoPrime (depending on substrate).

#### GranoSirocco*
GranoSirocco is an extremely versatile, subtle texture coating designed to for simulating a fine profile sandy finish. Can be applied by black texture roller. GranoSirocco can be left matt; (ie. not top coated) or top coated for enhanced durability, depending on specification.

#### GranoPearl Roll-on*
GranoPearl is a high-build, texture coating system, rolled on to give a bold texture or then hand worked to give a gentler, flattened finish. Top coated with GranolImpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

#### GranoRoll-on Coarse*
GranoRoll-on Coarse is an acrylic, high performance coating applied by coarse texture roller to achieve a coarse profiled texture. Top coated with GranolImpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

#### GranoRoll-on Medium*
GranoRoll-on Medium is an acrylic, high performance coating applied by black texture roller to achieve a medium profiled texture. Top coated with GranolImpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

#### GranoRoll-on Smooth*
GranoRoll-on Smooth is an acrylic, high performance coating applied by black texture roller to achieve a low to medium profiled texture. Top coated with GranolImpact, Granoshield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

#### GranoSoffit*
GranoSoffit is specialist soffit designed specifically for fast finishing of soffits and off-form concrete ceilings. GranoSoffit offers very low roller spatter and achieves a high opacity matt finish. Application is typically in one coat over GranoPrime (depending on substrate).

#### GranoSirocco*
GranoSirocco is an extremely versatile, subtle texture coating designed to for simulating a fine profile sandy finish. Can be applied by black texture roller. GranoSirocco can be left matt; (ie. not top coated) or top coated for enhanced durability, depending on specification.

#### GranoShield Matt*
A pure acrylic, high performance elastomeric coating. For use on building surfaces where an effective waterproofing and a decorative wall finish is required. Can be applied by nap roller and black texture roller. Matt finish.

#### GranoSkin Membrane
Single-pack high performance elastomeric acrylic coating. Can be applied by nap roller and black texture roller. For use on building surfaces where effective waterproofing and a decorative wall finish is required. Satin finish. Approved to APAS 0117/3 and APAS 0118/2, and AS/NZ4548.3

#### GranolImpact
A pure acrylic, high performance elastomeric coating able to be applied in a variety of styles by nap roller, black texture roller, spray or brush. Low sheen finish. Approved to APAS 0117/3 and APAS 0118/2

*Available ex Australia
Bag and Paint Texture Systems

- A convenient means to decorate with textured finishes
- Can assist with hiding minor irregularities
- Moderate skill levels required
- Available in fine to coarse finishes

- Various texture profiles can be achieved depending on:
  - Product being applied
  - Application tools being used

NB: These products can achieve multiple texture profiles using different application techniques

**GranoSahara**

**Bag & Paint Low Profile**
GranoSahara is an acrylic coating applied by roller, brush or lambswool mitt in one or two coats to give a convenient and economical means for simulating a low profile sandy or "bag and paint" finish. GranoSahara can be left matt; (ie. not top coated) or top coated with Granolmpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoSahara Fine**
GranoSahara Fine is an extremely versatile, subtle texture coating designed to give a convenient and economical means for simulating a fine profile sandy or "bag and paint" finish. GranoSahara Fine can be left matt; (ie. not top coated) or top coated with Granolmpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoSirocco**

**Bag & Paint Medium Profile**
GranoSirocco is an acrylic coating applied by roller, brush or lambswool mitt in one or two coats to give a convenient and economical means for simulating a medium profile sandy or "bag and paint" finish. GranoSirocco can be left matt; (ie. not top coated) or top coated with Granolmpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoSorrento**

**Bag & Paint High Profile**
GranoSorrento is a high build acrylic texture system that is applied by brush or lambswool mitt to create a high profile "bag and paint" Mediterranean style texture. GranoSorrento can be left matt; (ie. not top coated) or top coated with Granolmpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**Spray On Texture Systems**

- Can assist with hiding minor irregularities
- Spray applied textures allow the coating to be readily repaired, saving time and money
- Available in fine to coarse finishes
- High skill levels required
- Various texture profiles can be achieved depending on:
  - Product being applied
  - Method of application

NB: Some products can achieve multiple texture profiles using different application techniques

**GranoSpray-on Fine**
GranoSpray-on Fine is a spray applied pigmented acrylic texture coating giving an elegant yet traditional stone-like finish. Top coated with Granolmpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoSpray-on 2mm**
GranoSpray-on 2mm is a high-build acrylic texture coating system, spray-applied to give a stucco-like 2mm texture. Top coated with Granolmpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

*Available ex Australia*
Topcoats and Membranes

- Protect and seal the texture coats
- Superior colour availability and consistency compared to texture coats
- Moderate skill levels required

Texture profiles can be achieved depending on:
- Product being applied
- Application technique

NB: Some products can achieve multiple texture profiles using different application techniques

**GranoSkin Membrane**
Single-pack high performance elastomeric acrylic coating where facade waterproofing protection is required. It is used as an alternative high performance topcoat on Granosite textures for specialty substrate systems such as FC Sheets, Autoclaved Aerated Concrete (AAC), and expanded polystyrene. Satin finish. Approved to APAS 0117/3, APAS 0118/2, and AS/NZ4548.3

**GranoShield Matt**
Single-pack high performance elastomeric acrylic coating where facade weatherproofing protection is required. It is used as an alternative high performance topcoat on Granosite textures for specialty substrate systems such as FC Sheets, Autoclaved Aerated Concrete (AAC), and expanded polystyrene. Excellent resistance to mould and fungi. Low sheen finish. Approved to APAS 0117/3 and APAS 0118/2

**GranoImpact**
A pure acrylic, high performance elastomeric coating able to be applied in a variety of styles by roller, spray or brush. Granosite Impact also forms the final topcoat of many other Granosite systems, extending the performance and overall protection of the system applied. Excellent resistance to mould and fungi. Low sheen finish. Approved to APAS 0117/3 and APAS 0118/2

**GranoTrowl 1.5mm**
An economical and long lasting texture coating system that is applied by trowel and then floated to achieve a 1.5mm film build in a travertine or circular groove pattern. Top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoTrowl Sand Coarse**
GranoTrowl Sand Coarse is a tinted acrylic texture, applied by trowel, giving a finish reminiscent of weathered stone. GranoTrowl Sand Coarse may be left matt (ie. not top coated) or top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoPutz 1.5mm**
GranoPutz is an economical polymer modified cementitious, trowel applied texture finish that is applied by trowel and then floated to achieve a 1.5mm film build in a travertine or circular groove pattern. Top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoTrowl Sand Fine**
GranoTrowl Sand Fine is a tinted acrylic texture, applied by trowel, giving a fine grainy sand finish. GranoTrowl Sand Fine may be left matt (ie. not top coated) or top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoTrowl 2mm**
An economical and long lasting texture coating system that is applied by trowel and then floated to achieve a 2mm film build in a travertine or circular groove pattern. Top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoPutz 2mm**
GranoPutz is an economical polymer modified cementitious, trowel applied texture finish that is applied by trowel and then floated to achieve a 2mm film build in a travertine or circular groove pattern. Top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoGlaze**
A tough, clear, pure acrylic coating, that can be roller or spray applied in one or two coats that retains the natural appearance of the substrate while enhancing its texture and colour. Normally applied over Granosite aggregate finishes. Satin finish.

**GranoMarble**
GranoMarble is a sophisticated grainy texture applied by trowel. GranoMarble may be left matt (ie. not top coated) or top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification. GranoMarble is pigmented primarily with crushed and graded marble.

**GranoMarble Fast**
GranoMarble Fast has fast finishing properties allowing it to be floated immediately a sophisticated grainy texture applied by trowel. GranoMarble Fast may be left matt (ie. not top coated) or top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoTrowl Sand Fine**
GranoTrowl Sand Fine is a tinted acrylic texture, applied by trowel, giving a fine grainy sand finish. GranoTrowl Sand Fine may be left matt (ie. not top coated) or top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

Trowel On Texture Systems

- High film builds allow better opportunities to hide surface irregularities
- Available in fine sand to coarse travertine finishes
- Plastering skill levels required

Various texture profiles can be achieved depending on:
- Product being applied
- Application tools being used

NB: Some products can achieve multiple texture profiles using different application techniques

**GranoMarble Trowel-on**
GranoMarble Trowel-on is a modified cementitious, trowel applied texture finish that is applied by trowel and then floated to achieve a 1.5mm film build in a travertine or circular groove pattern. Top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoTrowl 1.5mm**
GranoTrowl 1.5mm is a modified cementitious, trowel applied texture finish that is applied by trowel and then floated to achieve a 1.5mm film build in a travertine or circular groove pattern. Top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoPutz 1.5mm**
GranoPutz is an economical polymer modified cementitious, trowel applied texture finish that is applied by trowel and then floated to achieve a 1.5mm film build in a travertine or circular groove pattern. Top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.

**GranoTrowl 2mm**
GranoTrowl 2mm is an economical and long lasting texture coating system that is applied by trowel and then floated to achieve a 2mm film build in a travertine or circular groove pattern. Top coated with Granolimpact, GranoShield Matt or GranoSkin Membrane for enhanced durability, depending on specification.
Aggregate Texture Systems

Available in natural aggregate finishes. Can assist with hiding minor irregularities. Available in fine to coarse finishes. Very high skill levels required. Various texture profiles can be achieved depending on:
- Product being applied
- Type of application
  - Spray applied
  - Trowel applied

NB: Some products can achieve multiple texture profiles using different application techniques.

GranoStone 1mm*
Consists of a tough, pigmented acrylic-based binding layer, applied first by black texture roller or spray onto which is then embedded a 1mm graded aggregate. It may be over coated with GranoGlaze Satin to seal and provide enhanced durability and performance to the system.

GranoStone 2mm*
Consists of a tough, pigmented acrylic-based binding layer, applied first by black texture roller or spray into which is then embedded a 2mm graded aggregate. It may be over coated with GranoGlaze Satin to seal and provide enhanced durability and performance to the system.

GranoStone 3.5mm
Consists of a tough, pigmented acrylic-based binding layer, applied first by black texture roller or spray into which is then embedded a 3.5mm graded aggregate. It may be over coated with GranoGlaze Satin to seal and provide enhanced durability and performance to the system.

GranoElegance*
GranoElegance is a spray applied acrylic-aggregate mixture that combines the beauty of naturally-coloured Australian aggregates, with the durability of proven Granosite binder technology. Available in three styles: Natural, Harmony and Contrast of which Natural and Harmony can be trowelled off to give a compacted finish. It may be over coated with GranoGlaze Satin to seal and provide enhanced durability and performance to the system.

GranoGranit 2mm*
A premixed acrylic/aggregate coating of 2mm aggregate applied by trowel to give a smooth dense finish of various natural aggregate colours. It may be over coated with GranoGlaze Satin to seal and provide enhanced durability and performance to the system.

GranoGranit 3.5mm
A premixed acrylic/aggregate coating of 3.5mm aggregate applied by trowel to give a smooth dense finish of various natural aggregate colours. It may be over coated with GranoGlaze Satin to seal and provide enhanced durability and performance to the system.

GranoElegance
GranoElegance is a spray applied acrylic-aggregate mixture that combines the beauty of naturally-coloured Australian aggregates, with the durability of proven Granosite binder technology. Available in three styles: Natural, Harmony and Contrast of which Natural and Harmony can be trowelled off to give a compacted finish. It may be over coated with GranoGlaze Satin to seal and provide enhanced durability and performance to the system.

Aggregate Colour Range

- The Granosite aggregate range of products is available in 12 standard colour blends
- The following list shows which aggregate blends are available for specific products. (Photographic and printed images may not represent the true colour. These should be used as an indicative guide only)
- The Granosite aggregate range of products are Made To Order (MTO) products
- It is recommended that a sample is approved prior to ordering product
- Delivery times are subject to product availability

Amber Sand
- GranoStone 1mm
  - Applied using Hopper Gun and Medium Black Texture Roller

White Sand
- GranoStone 1mm
  - Applied using Hopper Gun and Medium Black Texture Roller

Black Granite
- GranoStone 2mm
  - Applied by Hopper Gun & Stainless Steel Trowel

Brilliant White Marble
- GranoStone 2mm
  - GranoStone 3.5mm
  - GranoGranit, GranoElegance

Burgundy
- GranoStone 2mm, GranoGranit, GranoElegance

Calca Granite
- GranoStone 2mm, GranoGranit, GranoElegance

Champagne
- GranoStone 2mm, GranoGranit, GranoElegance

Cudgee Blend
- GranoStone 2mm, GranoGranit, GranoElegance

Koonunga Blue
- GranoStone 2mm, GranoGranit, GranoElegance

Padthaway Green
- GranoStone 2mm, GranoGranit, GranoElegance

Sienna Granite
- GranoStone 2mm, GranoGranit, GranoElegance

Sunset Gold Marble
- GranoStone 2mm, GranoGranit, GranoElegance

GranoGranit 2mm*
GranoGranit 3.5mm*

*Available ex Australia
### Granosite Texture Solutions

- Since 1952, Granosite has pioneered the design, manufacture and application of specialist architectural coatings in Australia, New Zealand, Asia and the Pacific region.
- Granosite provides stylish, long lasting and cost effective coating and texture systems for the architectural, engineering and construction industries.
- Granosite texture coatings are specified in systems comprising of: preparation, texture and top coat products.
- Granosite’s comprehensive range of products suit residential, commercial and industrial buildings.

### Why Use a Texture Coating?

- Texture coating systems can be applied over a variety of surfaces for aesthetic appeal.
- Texture coatings are durable, low maintenance surface coatings and finishing systems for a variety of substrates.
- Texture coatings give decorative appearances with a higher film build which can disguise surface defects.
- A greater range of finishes can be achieved compared to conventional paint systems.
